 with existing (77700-VC5044) roof

AC Components Required
Ordered Directly from Curtis

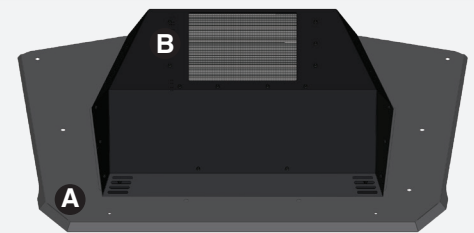

(1ACX1130) - fits X1130

Note: AC Includes Roof

**If unit will be operated in 1 row configuration, a center panel is required*

- 1 Two double squirrel cage blowers move an impressive 610 CFM volume of air.
- 2 36 pass 24,000 BTU evaporator core with a 2 ton valve produces enough ice cold air for both 1 and 2 row configurations.
- 3 10 adjustable vents fully distribute air throughout the cabin to keep operator and passengers comfortable.
- 4 A highly efficient and reliable 77cc scroll compressor provides plenty of refrigerant flow even at engine idle.

Exterior Unit

- A** Cover removes easily for access to internal components such as fuses and relays
- B** Ample air inlet grille area provides plenty of fresh air to condenser fan
