

California Proposition 65

To Curtis Customers:

In accordance with California Proposition 65 (*The California Safe Drinking Water and Toxic Enforcement Act*), companies that do business in California must provide a warning of the danger of exposure to certain chemicals.

To maintain compliance, Curtis Industries will begin labeling all appropriate products with the following notice:

WARNING: This product may contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

All Curtis dealers selling to customers in California *must* provide a warning to any person to whom the product is sold or transferred unless the product is packaged or labeled with a “clear and reasonable” warning. For more information visit www.p65warnings.ca.gov.

The following link will direct you to the California Office of Environmental Health Hazard Assessment for a complete list of chemicals covered by Proposition 65:
